

UREC DISC GOLF COURSE INFORMATION

Disc Golf is played much like traditional golf, however, players use a flying disc. The object is to complete each hole in the fewest number of throws. A golf disc is thrown from a tee area to a target which is the hole. As a player progresses down the fairway, he or she must make each consecutive shot from the spot where the previous throw has landed. Finally, the putt lands in the basket and the hole is completed. Learn more about the sport by visiting the Professional Disc Golf Association website at www.pdga.com.
